MECHS Path to College/Study Skills

Path to College 9th period provides students an opportunity for enrichment, extra study time, or targeted support with a specific teacher and subject of their choosing. Each 9th period on Tuesdays and Thursdays students and faculty are able to attend class selections that best suit their educational needs or desired support. A "flex schedule" is created on a marking period to marking period basis where students are enrolled in a requesting teacher's 9th period or a club/organization the student is a part of. Some students have targeted support for TSI, STAAR testing, or classes they are behind on.

11th and 12th grade students are eligible to receive one "study hall" period per day. Study Hall periods allow students the flexibility to travel to UTEP or Valle Verde for classes or allow them time to work on homework/assignments while on campus and get extra assistance from MECHS faculty if needed.
