Exclude per the *SISD Exclusion Policy & **Communicable Disease Chart.

OR

Refer to health care provider for decisions on further guidance and readmission.

Only if tested, student will be excluded until results validated.

Positive COVID PCR Test
Quarantine for 10 days and until 24 hours fever-free (without medications) and improvement in symptoms. If they test positive, refer to the LPHA.

Negative COVID PCR Test
Remain home until 24 hours symptom free.

2 Symptoms compatible with COVID-19 + Had a close contact with a confirmed or presumptive case in the past 14 days.

Student is now a presumptive case; refer to **4**

Student's household contacts may now fall under **3**

3 No COVID-19 Symptoms + Had a close contact with a confirmed or presumptive case of COVID-19 in the past 14 days.

Quarantine and self monitor for 14 days **after the last exposure (regardless of testing result).**
Do not exclude a contact of a close contact.

If the student develops symptoms, student is now a presumptive case. Refer to **4**

4 Student is reported as a confirmed or presumptive case of COVID-19.

If COVID positive + no symptoms, exclude for at least **14 days and 24 hours symptom free** (without use of medications).

If **symptomatic** (regardless of testing results), exclude the student for at least **10 days and 24 hours symptom free** (without use of medications).

- Collaborate with *Department of Public Health* to:
- Verify reported case is laboratory confirmed and/or obtain physician verification.
 - Identify exposure time frame and determine if student was at school during infectious period.
 - Identify cohorts and staff to obtain logs for, and quarantine as necessary.
 - Determine in collaboration with Department of Public Health if select cohorts should be quarantined or if school closure is warranted.
 - Collaborate on sanitation procedures & communication to community and staff.

Household and other close contact must quarantine per guidance in **3**
